REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1 and 3 are patentable over the prior art patents and printed publications because of the specific timing sequences of writing image signals in and reading image signals out of memory in an image forming apparatus, which includes scanning means for scanning a photosensitive member with a first light beam and a second light beam, a first memory for storing an image signal for modulating the first light beam, a second memory for storing an image signal for modulating the second light beam, and memory control means for starting writing an image signal for a first light beam in said first memory before an image signal for a first light beam for previous scanning is completely read out from said first memory, and starting writing an image signal for a second light beam in said second memory after an image signal for a second light beam for previous scanning is read out from said second memory. The combined limitations are not taught by the art of record alone or in combination.

Claims 2 and 4 are allowed because they are dependent from claims 1 and 3 above, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
